Re: RM-11683, IB Docket No. 12-340

Dear Ms. Dortch:

I am writing today to recommend that the Federal Communications Commission approve the application before your agency to modify LightSquared's license to operate.

As a small business owner, I am extremely encouraged with LightSquared's most recent proposal and agreement to forego terrestrial rights to its spectrum closest to the GPS band. Like many entrepreneurs, I find LightSquared's wholesale business model appealing and believe such an approach could do wonders for enhancing competition and consumer choice within the wireless sector. My work often takes me to locales throughout the country, including many metropolitan markets where, even there, broadband capabilities are lacking and, in many cases, dropped calls and ridiculously low speeds are simply par for the course.

Not only am I firmly convinced that the approval of LightSquared's license modification would well-serve the public interest, but I'm also optimistic the company's latest plans will do the trick when it comes to protecting obviously critical government services which rely on GPS. Thank you for considering my comments on behalf of the company. I urge you to move post-haste in granting approval of its application.

Sincerely,

A handwritten signature in black ink, appearing to read 'Adam Wasserman', with a long, sweeping horizontal line extending to the right.
